

PRESIDENTIAL SERIES

NTwindow®

CLASSIC STYLE. HIGH PERFORMANCE FEATURES. ENDLESS OPTIONS.

When choosing to replace the windows and doors in your home there are many points to consider.

The Presidential Series Window line offers you a perfect combination of state of the art technology and handcrafted design. Whether your home is traditional or contemporary you can select just the right options that reflect your own taste and style.

Choose Presidential. Enjoy Countless Benefits.

Superior Ultraviolet Rays Protection SilverGuard³ provides fading protection you can trust. SilverGuard³ blocks 95% of the sun's most damaging ultraviolet rays which is a leading cause of furniture fading. A key component within the Presidential Series product design. SilverGuard³ will help keep your furniture, carpets, curtains and wall coverings beautiful for years to come.

Cost Savings

Presidential Series Windows feature Enviroseal NXT by Super Spacer[™] technology which helps to block heat and cold from passing through the window system. By keeping the elements passing through, you will use less energy to heat and cool your home. This translates to savings on your energy bills and gives those temperature swings the boot.

Noise Reduction

If you live next to a busy road, have restless neighbors next door, hear airplane noise overhead or power tools blasting on a Saturday morning, EnviroSeal NXT[™] technology helps keep it quiet inside your home.

Here's how it works:

The closed-cell polymer foam in Super Spacer[®] transmits very little sound compared to conventional metal spacers. Just another reason you'll be more comfortable in your home.*

**Statement applies to transfer of noise through the windows only.*

See the difference.

Our spacer design offsets the effects of:

Temperature Changes
Barometric Pressure Changes

Wind Load
Glazing Pressure

Conventional Metal Spacer

Our Foam Spacer (non-metal)

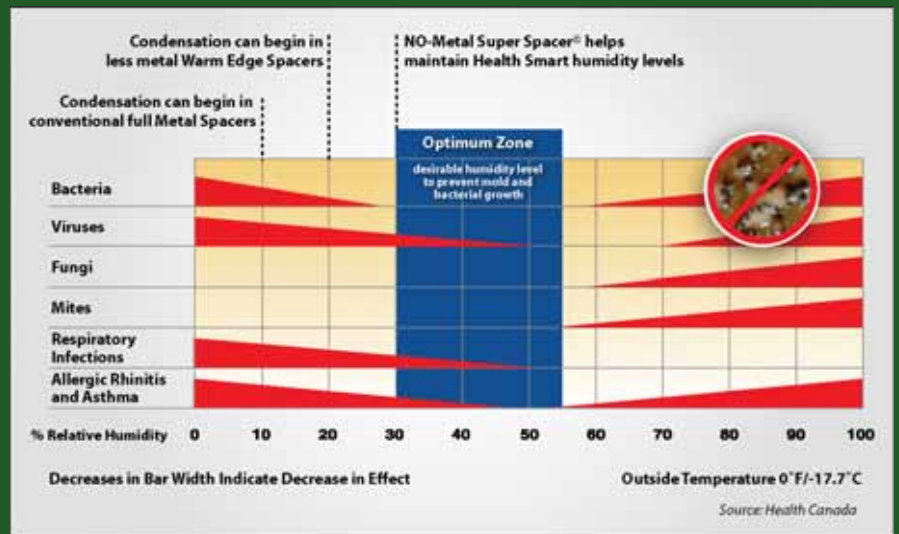

Longevity

EnviroSeal NXT[™] by Super Spacer technology is a dual-seal system that is known in the industry to last up to five times longer than single-seal systems proven after meeting the challenge of the P-1 chamber, the test many engineers consider the world's toughest.

One week spent in a P-1 chamber is equivalent to one year in the field. And since EnviroSeal NXT[™] survives 125 plus weeks, well let's just say that you will enjoy a lifetime of comfort, energy savings and quality performance from your new Presidential Series Windows.

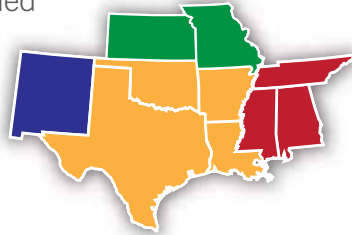

Mold Prevention

Let's face it, condensation is a problem that looks unsightly and over time can stain wood, peel paint and rot frames. Condensation can also lead to mold growth, which has been linked to childhood asthma and an increase in general respiratory illness, allergies and outbreaks of fungal disease. EnviroSeal NXT™ virtually eliminates condensation – which in turn keeps your walls and windows in perfect condition, while keeping the potential for mold growth away from you and your family.

Save With ENERGY STAR®

Installing ENERGY STAR qualified windows lowers energy bills and saves you money over vsingle-pane and even new double-paned, clear-glass windows. Presidential Series Windows with our high performance glass package are ENERGY STAR qualified for all regions.

State	Annual Savings
New Mexico	\$381
Texas, Oklahoma, Arkansas, Louisiana	\$352
Kansas, Missouri	\$266
Tennessee, Mississippi, Alabama	\$349

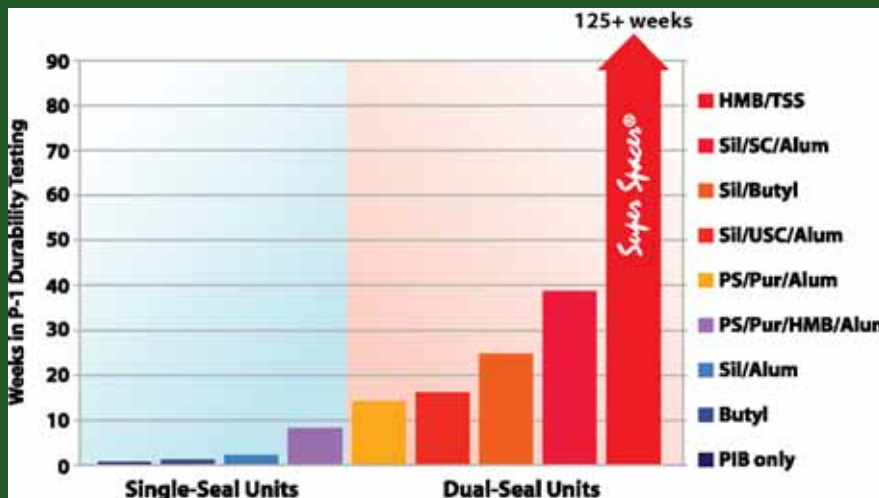

A Warranty Worth Reading.
