On Thursday March 8th the Rachel Ray Show will feature a segment of an upcoming episode of HGTV's Curb Appeal, which features NT Windows VividColor™ Color Matched Replacement Windows. In the episode, one special neighborhood is selected to receive a host of makeovers to enhance the overall curb appeal of the block.

Considered by many as the ultimate home makeover block party, Curb Appeal is headed up by well known designer John Gidding. On the show John and his team come into a neighborhood and treat homeowners to a heavy dose of design transformations that make the neighborhood shine and leave the homeowners beaming with pride.

“Curb Appeal represents what our window and door products are all about,” said Ryon Ray, Chief Operating Officer of NT Window. He added, “Adding value and curb appeal to our customer’s homes and the neighborhood is a huge benefit of replacing. Not to mention, the energy saving and increased comfort experienced when adding high performance products to your home.” Once viewing the segment, the audience will get to see first hand the beautiful rich color of the windows John Gidding selected for the main home makeover for this project. Taking advantage of NT Window’s VividColor™ Exterior Color System, homeowners like those in the episode are able to get windows that are just the right color match for their home’s exterior. This gives customers more design choices when it comes to replacing old windows and doors in their homes.

While NT Window provided the windows for the main project, they were in fact installed by Brennan Enterprises who is an authorized NT Window dealer. Ray went on to add “We enjoyed working with Brennan Enterprises on this project. Brennan Enterprises does a great job providing homeowners with great products and service. Through our partnership and mutual efforts we have also been able to work with them in multiple charitable events.”

While the air date of the full Curb Appeal: The Block episode has yet to be announced, the Rachel Ray Show will feature a segment March 8th for those who want to catch a sneak peek of what went on with the makeovers on the show. Viewers should check their local listings for airtimes.
