

- A - Dow pre-expanded polystyrene frame and sash insulation to greatly increase insulating values
- B - Triple glaze using Cardinal LoE-366 double strength glass for maximum SHGC and UV protection
- C - Enviroseal NXT spacer by *Super Spacers*™ for true warm edge technology
- D - Wet glazed using high performance silicon for complete air and water integrity
- E - All frame sash corners fusion welded at 45 degrees to eliminate all air and water
- F - 7 degree true slope sill to naturally drain all water (with double weatherstripped interior leg)
- G - High performance cam action locks that out-perform industry standards
- H - Two integral sash security night latches
- I - 3-1/4" 100% pure virgin PVC frame with multiple chambers and heavy walls, designed for maximum structural strength
- J - Full aluminum reinforced meeting rails for maximum strength wide and deep interlocks
- K - Tested to meet and/or surpass all industry standards by Energy Star, NFRC, AAMA and EWC
- L - Surpassing Energy Star standards for 2015 today
